

My Money

Smart Investing For Everyone.

Smart Investing. Saving For Your Retirement.

Saving for retirement is often neglected as we cope with daily expenses, pay off home loans and save towards our children's education. Yet, more than ever, we need to ensure sufficient funds are set aside for our golden years.

With inflation and a low interest rate environment, we need to find ways to make our money work harder for us. Are there financial products and investment strategies that are more suitable than others? What are their risks?

At the next My Money seminar, industry speakers will share their insights into investing to build retirement savings and how you can tap investment instruments like stocks or bonds to do this.

PROGRAMME HIGHLIGHTS

- **Investing To Grow Your Retirement Savings**
Mr Lim Wyson
The Association of Banks in Singapore (ABS)
- **What You Should Consider Before Investing For Retirement**
Associate Professor Jeremy Goh
