

# Lasting Impressions

## The art of entertaining with elegance and grace.

A great party does not have to be extravagant, it just requires lots of imagination and preparation. And you don't need a special occasion to invite friends over for feasting. Be adventurous with your themes – celebrate good weather, womanhood or even candy cane stripes!

When planning your party, remember to take it easy and have lots of fun. To create a truly unique affair, add a personal touch to your invitations, decorations and party favours – your favourite flower perhaps, or caricatures of your guests. And take note of your guests' allergies to avoid any emergency situations! And if you can't think of any activities or games for the party, don't fret. Just create a comfortable environment for them to move around in and to get acquainted with one another. And once all your guests are relaxed and enjoying themselves, it's time for you to grab a drink, kick off your heels and have fun.
